

THE LEXINGTON FIREPLACE

THE Lexington Fireplace

The Lexington Fireplace Mantel is a beautiful combination of our New England Veneer Stone®, a coved-edge hearth, and a 9" high trimmed mantel with carved corbels. The top is finished with crown molding and the center of the overmantel is framed with 5" trim molding - the perfect spot for artwork or flatscreen. It all comes together to lend warmth and understated elegance to your home.

On the reverse: the pictured mantel and hearth were cast in Traditional Buff color with an etched limestone finish. The veneer was created in a custom buff color to match.

Insert: (Not included) Shown with the elegant TC42 Gas Fireplace insert from Town and Country Luxury Fireplaces. **Visit townandcountryfireplaces.net for more information.**

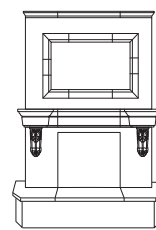

Please inquire about custom sizes, colors and finishes.
