

THE CAPE NEDDICK FIREPLACE

Premiered at
HPBExpo 2016
In New Orleans!

THE Cape Neddick Fireplace

The Cape Neddick is a stunning fireplace mantel with a rich history. The bricks that we modeled our design from are said to originate from a shipwreck off the coast of Maine. The intricate carvings complement our New England Veneer Stone® beautifully. The overmantel is finished with stone crown molding and the center is framed with 5" stone trim - the perfect spot for artwork or flatscreen.

On the reverse: the pictured mantel and hearth were cast in our new Antique Terra Cotta color with an etched limestone finish. The custom mantel top is exotic walnut and is available as an option. The stone veneer is our popular ledgerstone in New England Blend.

Insert: (Not included) Show with the 864TRV insert with Bronze Patina Ironworks Double Doors model #95800739. Available from Travis Industries at www.fireplacex.com.

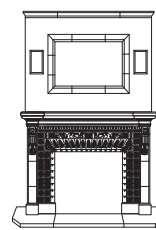

Please inquire about custom sizes, colors and finishes.
