

# MOLDINGS & VENEERS

NEW ENGLAND  
*Veneer Stone*<sup>®</sup>  
The *Natural* Choice

**YOU'VE NEVER SEEN STONE LIKE THIS.** Our architectural cast stone is unmatched in the marketplace and our veneers are the finest in existence. Mother Nature would have to agree.

Our process has taken 25 years to perfect. Cornerstone Architectural Products manufactures New England Veneer Stone® as well as a wide variety of architectural cast stone pieces - from the simplest post cap to the most elaborate fireplace mantel - using natural crushed marble and granite aggregates to create a superior product that is unrivaled in its consistent quality. The craftsmanship is apparent in every piece and the authentic feel of the stone will amaze you.

**CORNERSTONE**

## A GREENER STONE

**Q.** What's more environmental friendly than quarried cut stone?

**A.** Cornerstone architectural stone moldings and New England Veneer Stone®.

Tons of crushed stone waste is created in the production of natural stone veneer. Our time-tested methods utilize this crushed stone - along with recycled glass, iron oxides, and other natural colorants - and bind it into natural stone moldings, trims, and veneers with rich color that permeates the entire piece beyond the surface. It is an exacting process that yields beautiful results time after time. Stronger veneers and architectural cast stone with a positive impact on the environment? What could be better?

# ARTISTRY AND CLASSIC PRESENCE

Each of our stone veneers, moldings and trim are created by skilled artisans for a consistently beautiful product you can count on time after time.

## CORNER TRIM

Quoin panels were used to finish the corners of this custom home and are available in many sizes and styles - see page 34.

## GRAND ENTRANCE

Balusters and arched trim complete the front entrance in Traditional Buff.

## GET THE LOOK

DESIGNED TO BE BEAUTIFUL.  
ENGINEERED TO BE SMART.

Cornerstone Architectural Products' goal was to engineer stone veneers and trims that would be second to none in both artistry and integrity. We succeeded. During the designing of New England Veneer Stone®, our design team worked closely with scientists from Poraver®, an international manufacturer of post-consumer recycled glass. We utilized their lightweight aggregate in our mix formula to improve strength, thermal efficiency, acoustic performance, and freeze-thaw resistance - all while keeping our manufacturing process environmentally friendly.

A finish sealer is applied to the veneer to further enhance the durability of the stone by helping prevent efflorescence and making it resistant to mold, salt and UV rays.

These proprietary techniques enable us to provide a thicker, stronger veneer that adheres to the ASTM standards C1364 for architectural cast stone and C1670 for architectural thin stone veneer.

## Moldings

Cornerstone Architectural Products manufactures custom hearths made to the customer's specifications. Pictured is a large hearth in Gray Granite finish with Rock Edge, ready to be palletized and shipped.

## WE RISE TO THE CHALLENGE.

Cornerstone Architectural Products' number one priority is to manufacture a product of superior quality that has the look and feel of natural stone. Over the years, we have designed, manufactured, and installed custom pieces for residential and commercial projects throughout the United States.

Our artisans and professional mold-makers create detailed custom pieces from drawings or photographs.

With our state-of-the-art, 42,000 square foot manufacturing facility, we are able to perform jobs of all sizes. Cornerstone Architectural Products welcomes the opportunity to bid on your future project, whether it is a residential, commercial, or restoration project. We can facilitate all of your architectural cast stone requirements.

DESIGNED TO BE BEAUTIFUL.  
ENGINEERED TO BE SMART.

We've set the bar high. Cornerstone Architectural Products' design team worked closely with German scientists from Poraver<sup>®</sup> in the development of our New England Veneer Stone<sup>®</sup>. We utilized their lightweight aggregate in our mix formula to improve strength, thermal efficiency, acoustic performance, and freeze-thaw resistance - all while keeping our manufacturing process environmentally friendly.

## TECHNICAL DATA INFORMATION

Cornerstone Architectural Products adhere to the ASTM standards C1364 for architectural cast stone and C1670 for architectural thin stone veneer.

Properties	Our Standards
Compressive Strength	ASTM C39 >7000psi
Freeze/Thaw Characteristic	ASTM C666 <3% mass loss
Flexural Strength	ASTM C78 850psi
Tensile Strength	ASTM C190 800psi
Shear Bond Strength (adhesion)	ASTM C482 >100psi
ASR Resistance	ASTM C1567 Due to Poraver <sup>®</sup> and quality aggregates
Thermal Properties	ASTM C177-71 R-value .25 based on a 1.5" sample
Water Absorption	ASTM C642-97 1-3% depending on color.
Noncombustible	ASTM E119 Zero flame spread
Factory Sealed*	Water based silicate densifier, VOC free
Water Repellent*	Applied breathable water repellent sealer
UV Stable Color*	Naturally pigmented and sealed
Abrasion Resistance	Densified Exterior
Mold Resistance*	Moisture and mold resistant sealed exterior
Below Grade Durability	Dense • Breathable • Water repellent Freeze/Thaw Resistant
Efflorescence Resistance*	Low permeability and sealed
Acid Resistance*	Poraver <sup>®</sup> improved neutralization Acid repellent sealer

\*Sealant not applied to Moldings and Trim.

Cornerstone's chemist and a scientist from Poraver<sup>®</sup> work together to perfect the mix designs.

The results speak for themselves. The data shows superior strength and resistance to the elements.

## TECHNICAL INFORMATION

Installed weight: 15 lbs per square foot or less  
Strength: Break strength is in excess of 7000 psi - the strongest in the industry. Higher stone strength equates to less breakage in shipping and less waste.

## DELIVERY

**Veneer** is available in both flats and corners in all styles. Flat veneer is sold by the square foot and is available in boxes or crates. Corners are sold by the linear foot in boxes, half crates, or full crates. New England Veneer Stone® is shipped to authorized resellers throughout the USA.

**Moldings and Trim** are sold by the linear foot and are palletized.

### FLAT VENEER COVERAGE

Crate: 160 ft<sup>2</sup>  
Box: 5 ft<sup>2</sup>

### CORNER COVERAGE

Crate: 150 lf    ½ Crate: 75 lf  
Box: 5 lf

## INSTALLATION

Cornerstone Architectural Products are made with real stone aggregates and can be installed using traditional masonry methods. New England Veneer Stone® installation time is greatly reduced compared to natural stone due to less

breakage in shipping and consistent quality, stone after stone. If needed, the veneer may be cut and chiseled just as you would a quarry cut stone. The cut edge will reveal natural stone throughout and will appear lighter than the veneer face - just as a natural cut stone would appear lighter on a surface that has not been weather-aged. Moldings and trim may also be cut to size and will reveal color throughout, just as with the veneers.

## APPLICATION

New England Veneer Stone® has been subjected to extensive freeze-thaw tests and can withstand harsh climates. May be used for exterior and interior applications. It is suitable for use below grade and is UV, mold, and salt resistant.

## CLEANING\*

A gentle wash of 6% muriatic acid, or its equivalent, and water may be used. This is a mild solution of 8 oz. of acid per 1 gallon of water and will not harm our stone. However, acid based solutions may harm other building materials, so please consult with their manufacturers. A pressure washer can be used, but should not exceed 1,000 psi.

## WARRANTY

Please visit [cornerstoneproductsllc.com](http://cornerstoneproductsllc.com) for full details.

## NEW ENGLAND VENEER STONE COLORS

While no two New England Veneer Stones will ever be 100% alike in color, we do guarantee a consistent range. So when we say you'll receive peaches and pinks in our warm granite blend, or purples and greens in the orchard blend - that's a promise.\*\*

### TRADITIONAL TAN

Tan earth tones, including browns, beiges, blacks, and light grays with gold and mica accent specks.

### QUARTZITE GREEN

Greens with gray and subtle white accents.

### QUARTZITE GRAY

Dark grays with subtle white and tan accents.

### QUARTZITE GOLD

Golds and mustard colors with browns and beiges with mica accent specks.

## BLUESTONE

Slate blue and dark grays with tan and gold accents.

## WARM GRANITE BLEND

Peaches and pinks with light and dark grays with accents of white.

## COOL GRANITE BLEND

Browns, light and dark grays with white and tan accents.

## NEW ENGLAND BLEND

Light and dark grays, blacks, tans with occasional greens, pinks, peaches.

## ORCHARD BLEND

Purples and greens with light and dark grays and blues.

## CUSTOM

Custom veneer colors are also available to complement your design or match your restoration project.

## SAMPLES

The best way to experience the authentic nature and true colors of our New England Veneer Stone® and our Architectural Cast Stone Moldings is to see them for yourself. Please contact Cornerstone Architectural Products for a dealer location nearest you, or for a free sample board. Call 800-440-4119.

\*Not following these recommendations will void the warranty.  
\*\*New England Veneer Stone varies in color and pattern from piece to piece. Photos used in printed materials and on our website may not reflect the actual product and should not be used for color matching. Please contact Cornerstone Architectural Products for a free sample board.
